

For

3 properties

↳ While loop:-

- ✓ 1. Initialization
- ✓ 2. Condition
- ✓ 3. Incr/Decr

Syntax:-

```
① // Initialization  
while (② condition)  
{  
    // body of the loop.
```

③ incr/Decr [I] 2

E.g. Print 1 to 5
0 to 5

```
Var i = 1; ①  
while (i <= 5) { ②  
    console.log(i);  
    i++; ③  
}
```

5
4
3
2
1

```
var i = 5;  
while (i >= 1)  
{  
    console.log(i);  
    i--;  
}
```

i > 0
1

i >= 1

What is the time?
Eng.

Hindi

```
var sum = 0; ①  
for (var i = 0, j = 0; i < 10 & j < 10; ++i, j = i + 2) { ②  
    console.log(i);  
    console.log(j);  
    sum += i; // sum = sum + i  
}  
console.log(sum); ③
```

sum
0
i
0
j
0

&&3 -> 00

+ - + /

a = 2 b = 5 ③

true

a && b

And &&

6-10
OR

||
any of
if true
6-10

Bitwise
&

I/P		O/P
0	0	0
1	0	0
0	1	0
1	1	1

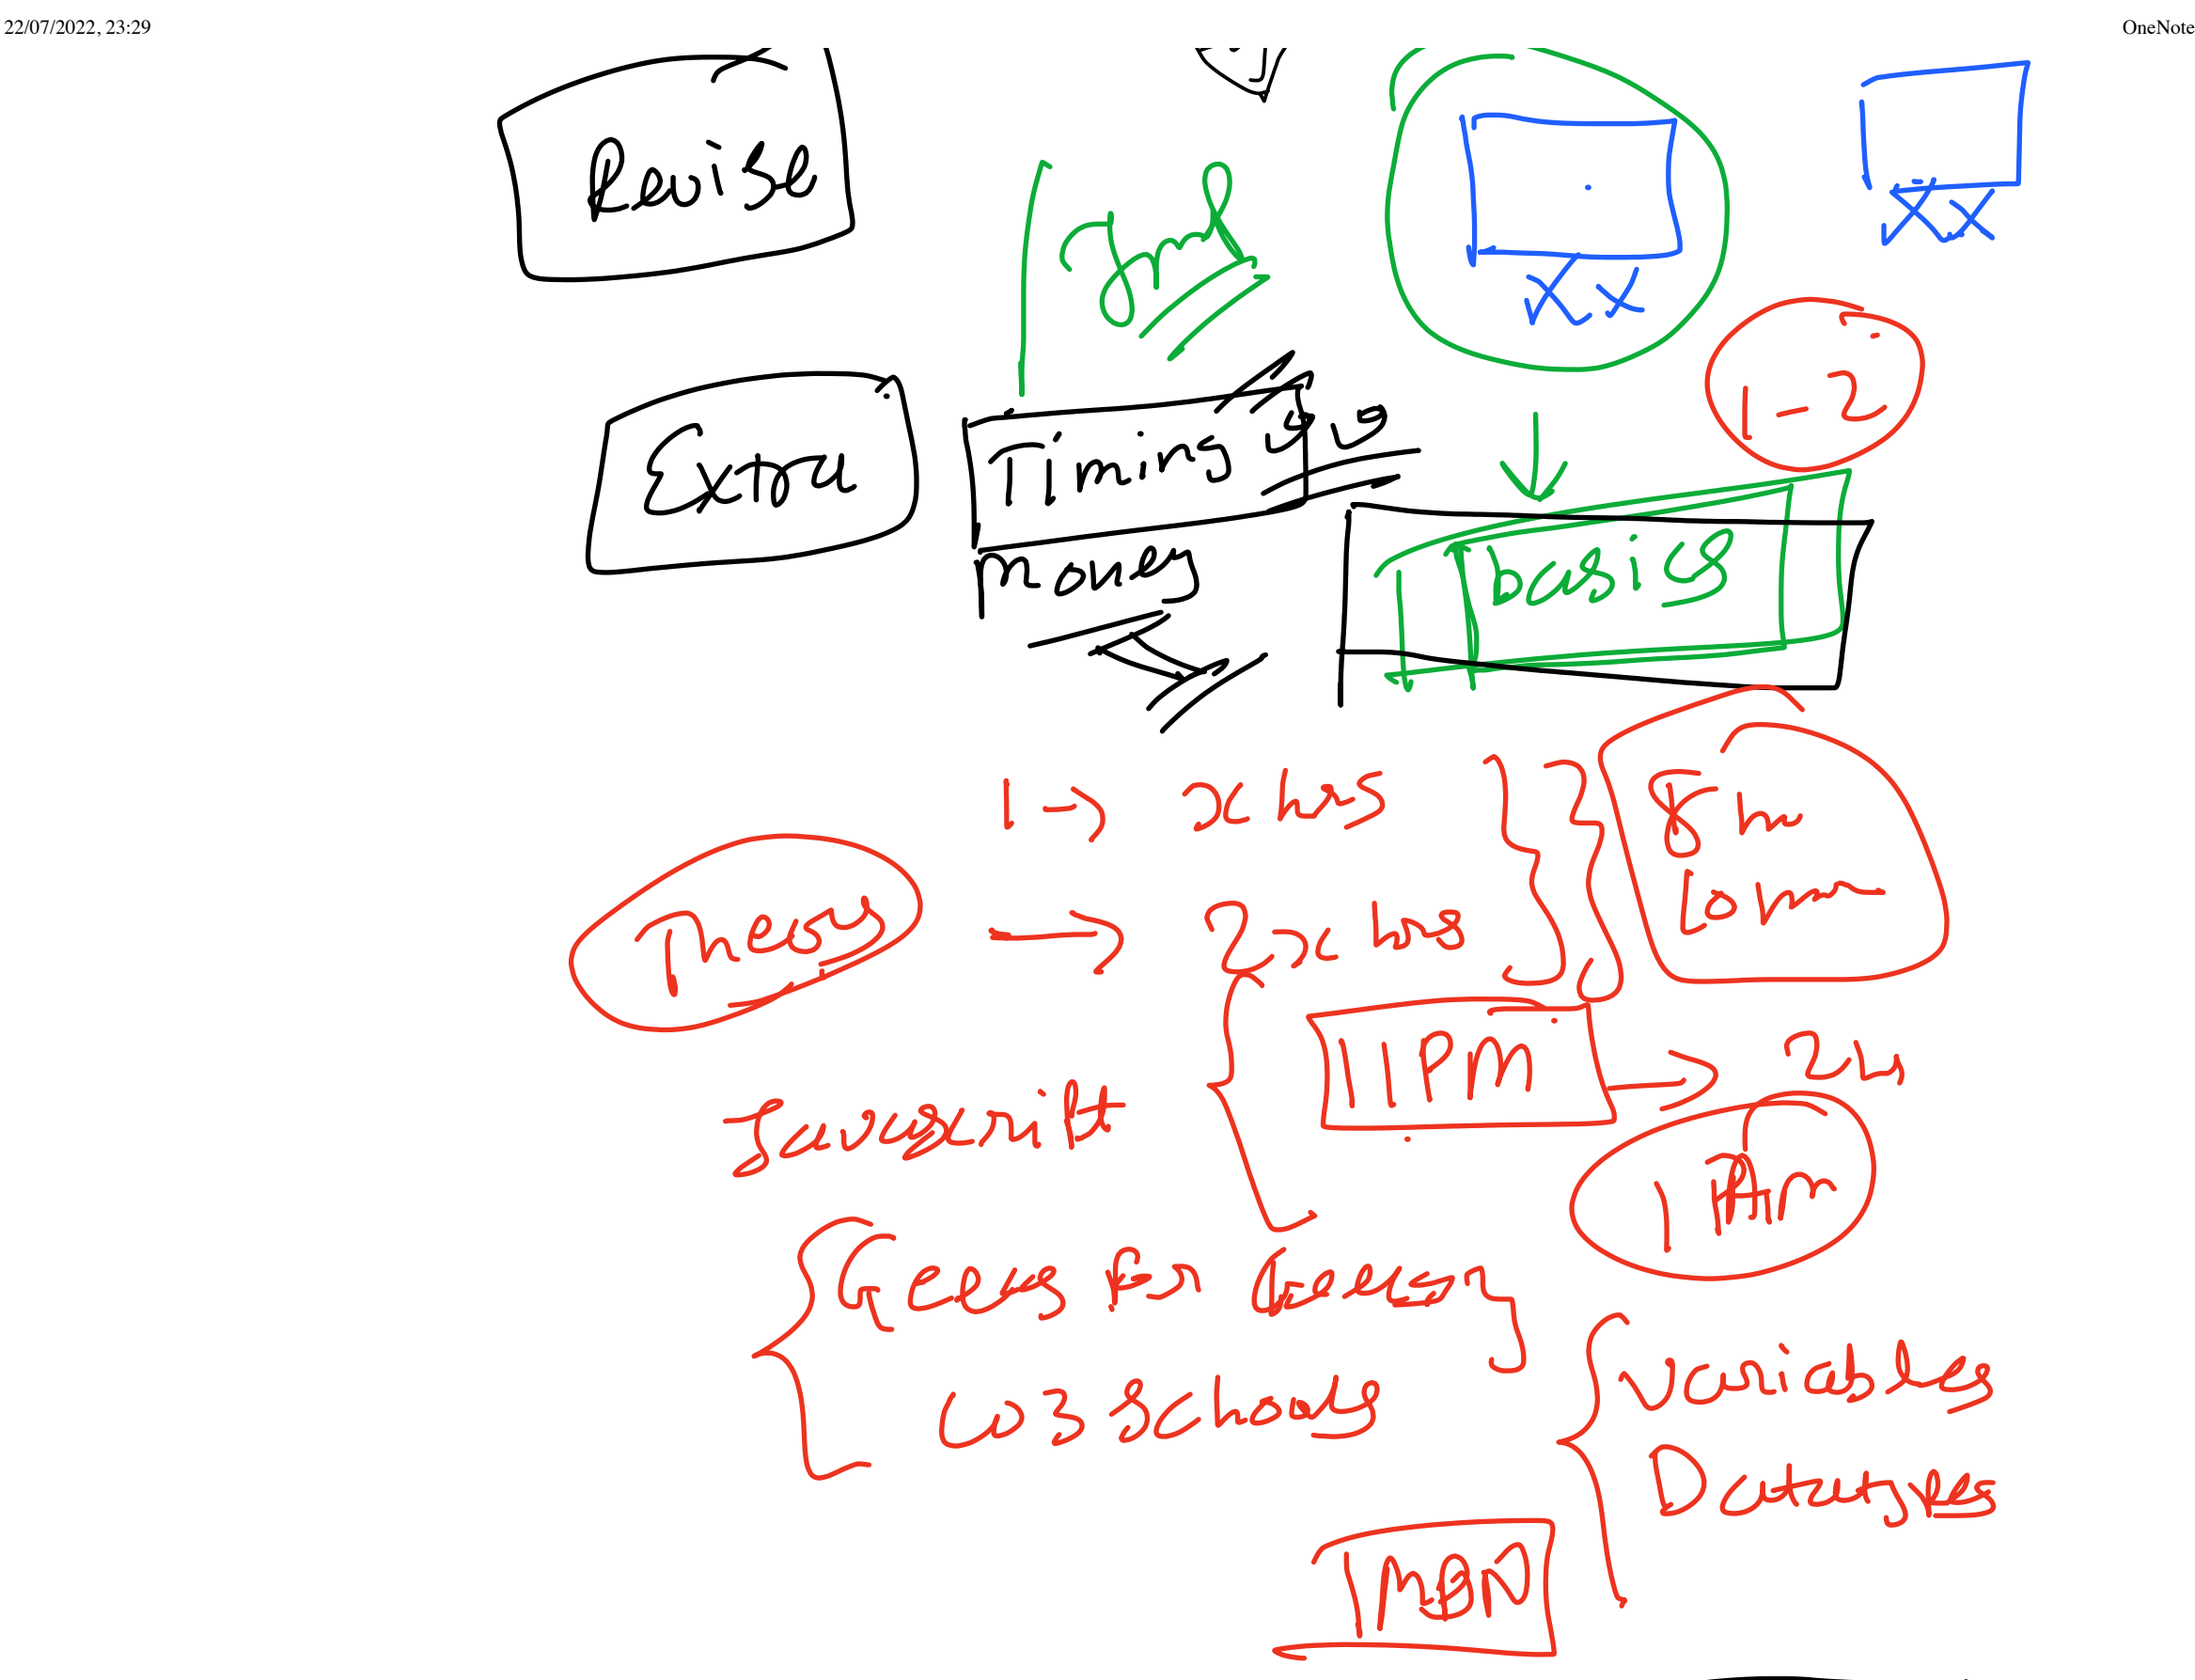

I/P		O/P
0	0	0
0	1	1
1	0	1
1	1	1

For while

foreach

And { Email OR mobil
Password }

And 3 -> 000

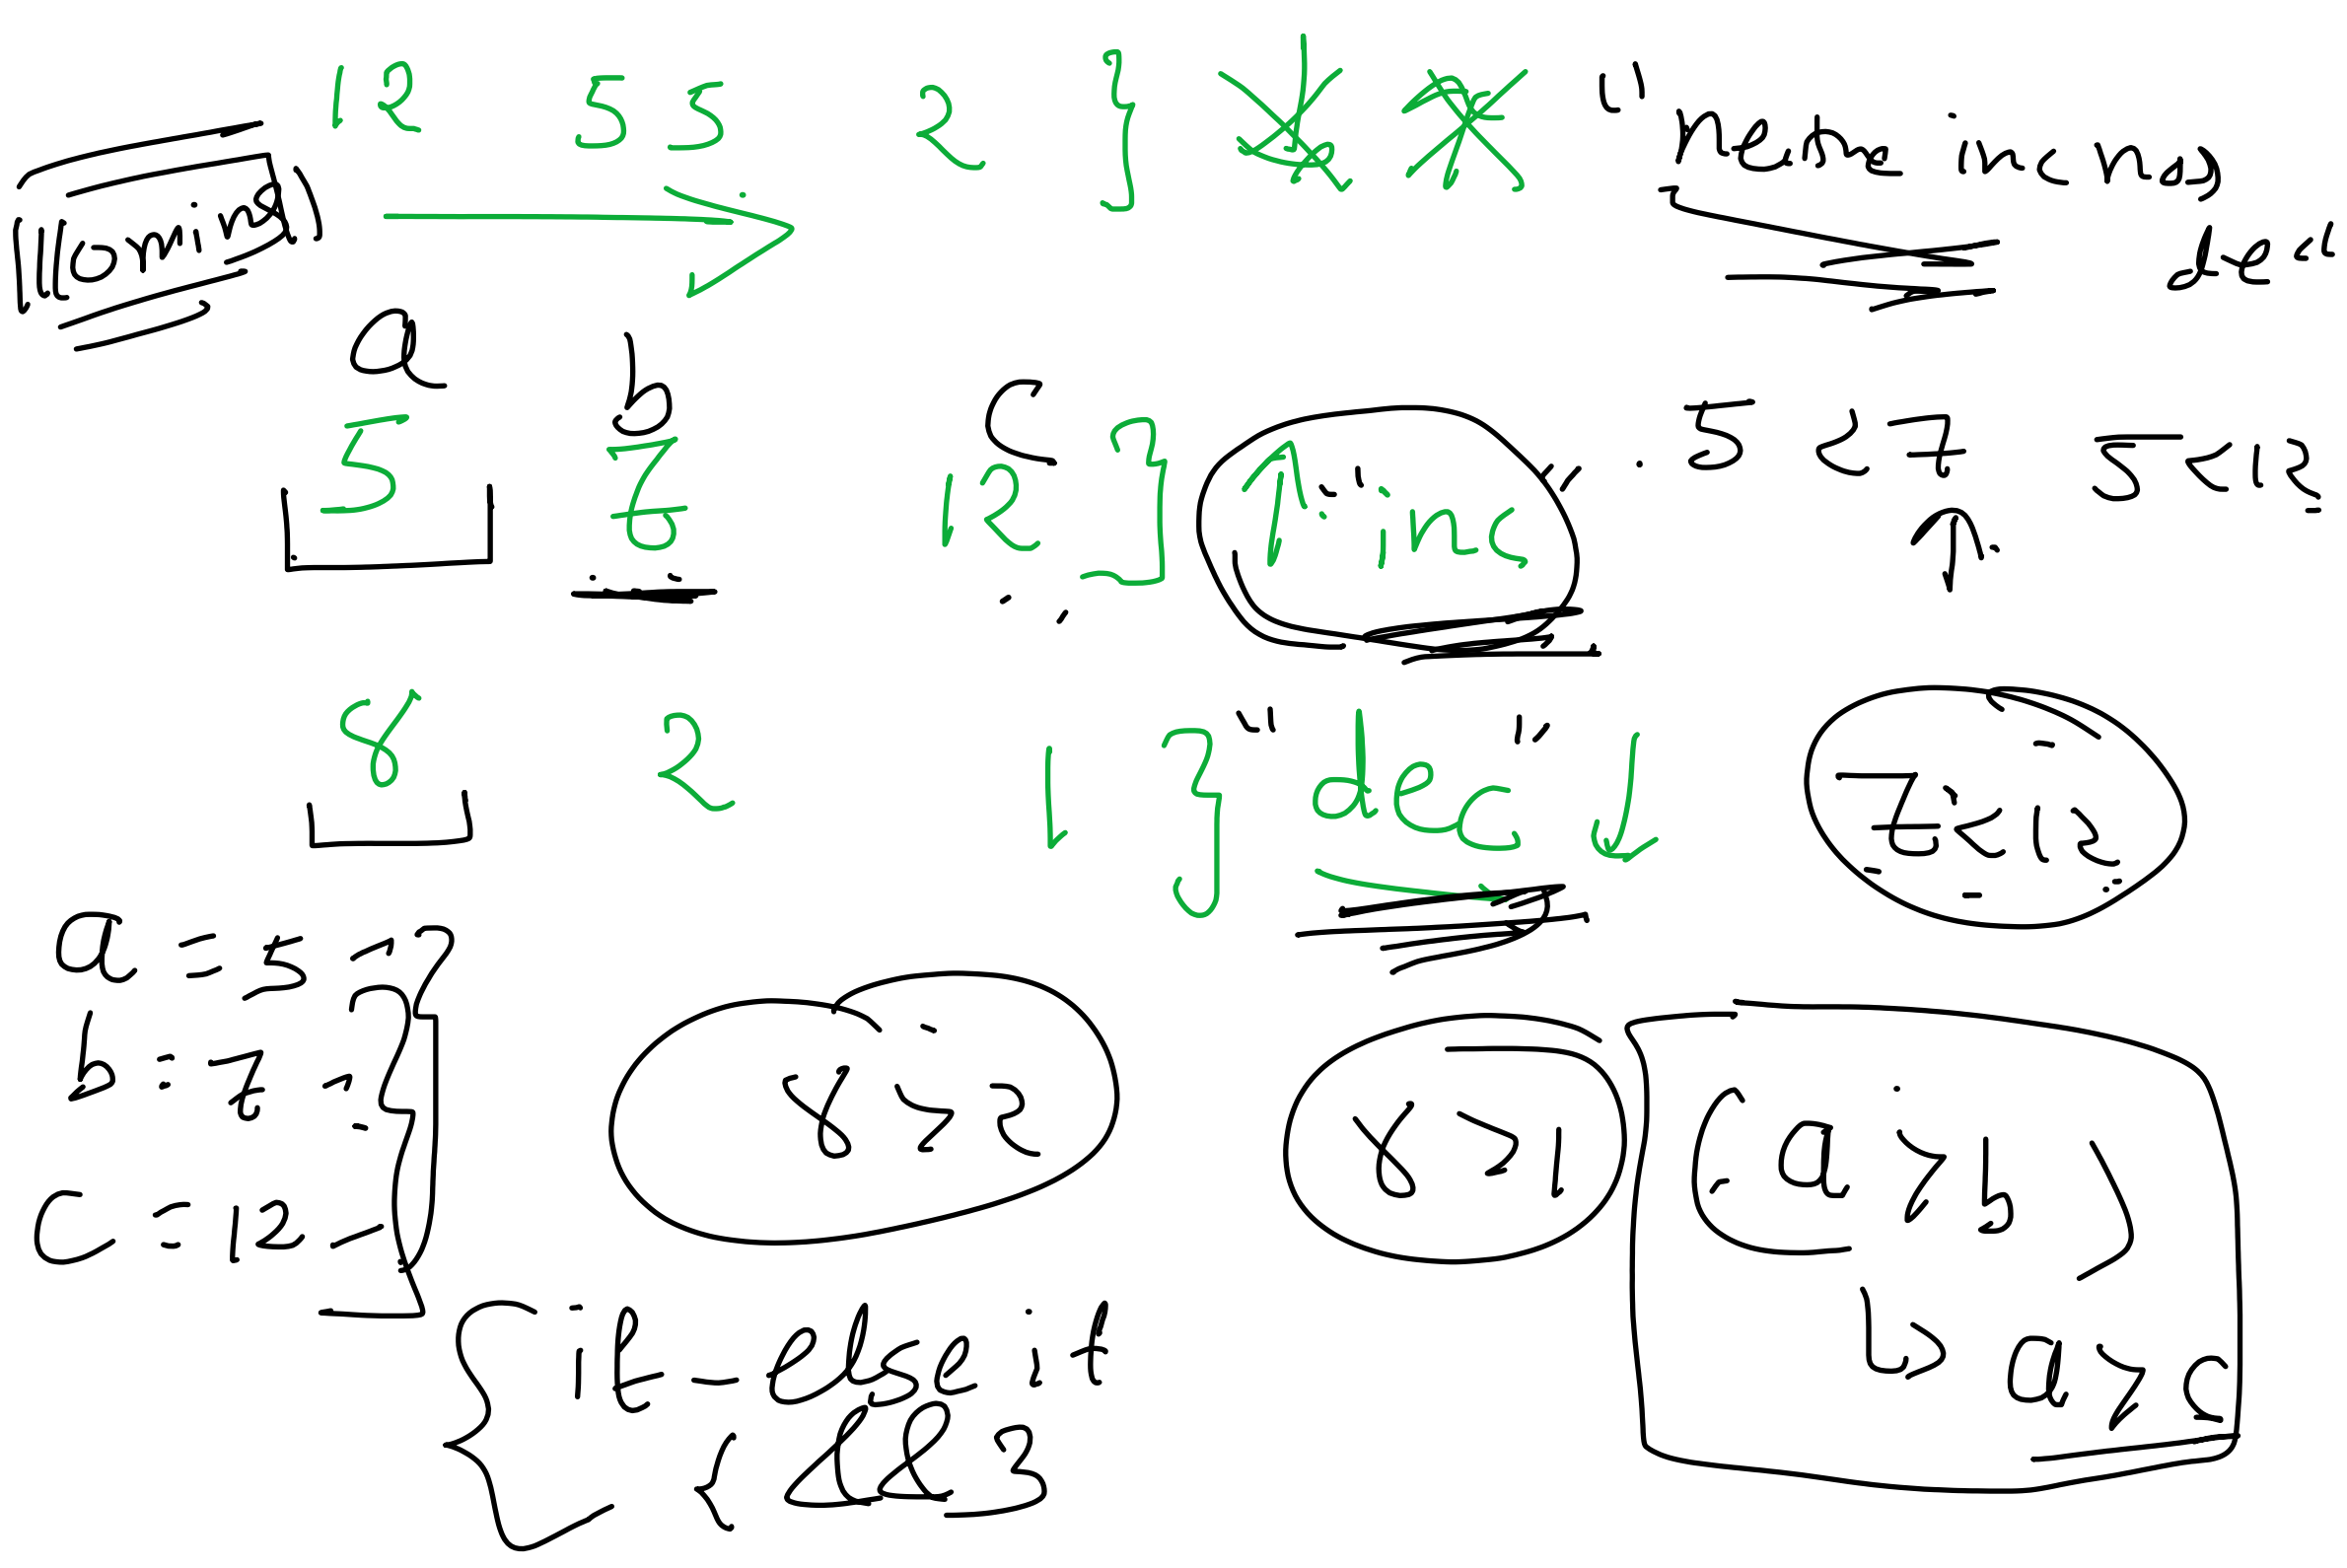

Jump Statements:-

1. break; } loops:-

2. continue; }

is the output of this question?

```
var i, j;
for(i=1; i<=2; i++){
  for(j=1; j<=2; j++){
    if(i==j){
      continue;
    }
    console.log(i, j);
  }
}
```

Increasing or Decreasing Order

Problem – Given three numbers. Your task is to check the order of three numbers. If they are in increasing order, print “Increasing order”. If they are in decreasing order, print “Decreasing Order” else print “neither increasing or decreasing order”

For example –

Input – 12, 45, 87

Output – Increasing order

Approach – Since this problem is based on condition, we can go with the If else block.

Steps -

- 1) Take three numbers as input a,b,c
- 2) If a>b and b>c - print “Decreasing order”
- 3) If a<b and b<c - print “Increasing order”
- 4) Else print “Neither increasing or decreasing order”

Grading System

Problem – Given a number as a score of the student. You need to assign the grade to the student based on the score

Grading system followed -

90 and above	A
80 to 89	B
60 to 79	C
33 - 59	D
below 33	F

Intuition - As per the grading system, we will assign the grade to the student using conditional statement - nested if-else ladder

Steps -

1. Take input score
2. Initialize grade
3. Implement a nested if-else ladder to find the grade based on the value of score

var marks = 93

60

$7 = 90 \rightarrow A$

$80 - 89 \rightarrow B$

$60 - 79 \rightarrow C$

$33 - 59 \rightarrow D$

$< 33 \rightarrow F$

M \rightarrow total no. of sessions $\rightarrow 100$

N \rightarrow attended no. of session $\rightarrow 30$ 80

$m \rightarrow 75\% \Rightarrow 75$

75

$- 30$

45

$N < M \rightarrow 75\%$

$\rightarrow 80\%$

logic
